

## Description

DUCT WRAP THERMAL INSULATION BLANKET DUCT WRAP is specifically designed as a thermal insulation blanket manufactured from highly resistant, organic glass fibre bonded with a resin. It is faced with an aluminium foil/skrim – reinforced kraft laminate providing a resistant surface finish and an excellent vapour barrier. A 120 mm overlapping flange is provided on one side for a neater appearance and adequate seal. DUCT WRAP is available in standard thicknesses of 25 mm, 40 mm and 50 mm and rolls of 10 m lengths.

## Technical Data

Label	Size
